## Profile

---

I earned a Bachelor of Science degree in Computer Science and Engineering from Islamic University of Technology (IUT) in March 2021. Soon after my graduation, I joined Nilavo Technologies Ltd. as a Junior Test Engineer. I have also been affiliated with Systems and Software Lab in IUT as a part-time researcher, since April 2021. In the lab, my research is on sign language recognition. Currently I am working on incorporating depth information in Bangla sign language, for better classification accuracy using Neural Networks. In terms of my career goal, I would like to pursue higher studies in Computer Science so that I can continue with my passion for research and development (R&D) fields.
